DETAILED ACTION

This communication is responsive to Amendment A, Filed 12/30/02.

Claims 12/30/02 are pending in this application. In the Amendment A, claims 9 and 18 were amended. This action is made Final.

Claim Objections

Claims 9 and 18 are objected to because of the following informalities:

Claim 9, line 9, the phrase “attaching the financial goal” should be “attaining the financial goal”.

Claim 18, line 11 and 12, the phrase “attaching the financial goal” should be “attaining the financial goal”. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-8, 10-17, and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Ferguson et al. (“Ferguson”, U.S. Pat No. 6,064,984).

Per claim 1, Ferguson teaches a method for providing a user interface, comprising the steps of:

(a) displaying a plurality of images in a frame, each of the images representing a goal (Figs.6 and 14; each image comprises of a plan event icon with one or more additional “arms” (elements 120a, 126, and 124 as show in Fig. 6));

(b) permitting a user to select from the images in the frame (col. 8, lines 47-51);

(c) permitting the user to adjust preferences related to the goal represented by the selected image in the frame (col. 8, lines 65-68); and

(d) altering the appearance of one or more of the images in the frame based on the adjusted preferences of the goal represented by the selected image (Fig. 6; Col. 9, lines 45-56).

Per claim 2, Ferguson teaches a method as recited in claim 1, wherein the step of permitting a user to adjust preferences related to the goal represented by the selected image in the frame further includes permitting the user to adjust a time expectation for the amount of time expected for achieving the goal represented by the selected image (Col 9, lines 57 – 67).

Per claim 3, Ferguson teaches a method as recited in claim 1, wherein the step of permitting a user to adjust preferences related to the goal represented by the selected image in the frame further includes permitting the user to adjust a quality expectation for the degree of quality expected for the goal represented by the selected image, and wherein appearance of the selected image is altered in relation to the adjustment of the expectation with respect to quality for the goal (Col. 9 line 45-56; Col. 9, lines 57 - 67)

Per claim 4, Ferguson teaches a method as recited in claim 1, wherein the step of permitting a user to adjust preferences related to the goal represented by the selected image in the frame further includes permitting the user to adjust a degree of favoritism between time and quality with respect to the goal of the selected image (Col 9, lines 57-67).

Per claim 5, Ferguson teaches a method as recited in claim 1, further comprising the steps of: displaying a selectable link to a personal profile frame, and displaying the personal profile frame upon selection of the selectable link, wherein a personal profile of the user is displayed in the personal profile frame (Col. 10, lines 62 – 67)

Per claim 6, Ferguson teaches a method as recited in claim 1, further comprising the steps of displaying a selectable link to a financial assumptions frame, and displaying financial assumptions frame upon selection of the selectable link, wherein financial assumptions relating to achieving the financial goals are displayed in the financial assumptions frame (Figs 8-13; Col. 11, lines 8-12).

Per claim 7, Ferguson teaches a method as recited in claim 1, further comprising the step of displaying in the frame a summary of changes in achieving the goals as a result of the adjust preferences (Col. 10, lines 56-58)

Per claim 8, Ferguson teaches a method as recited in claim 1, wherein the images representing goals include at least one of: a first image for representing a home goal, a second image for representing a vehicle goal, a third image for representing a monthly allowance and savings goal, a fourth image for representing a planned furniture expenses goal, a fifth image for representing a planned appliance expenses goal, a sixth image for representing a vacation goal, a seventh image for representing a children's education goal, an eighth image for representing a planned furniture expenses goal (Fig. 14; Col 7. lines 63-67).

Claims 10-17 are similar in scope to claim 1-8 respectively, and are therefore rejected under similar rationale.

Claim 19 is similar in scope to claim 1 and is therefore rejected under similar rationale.

Response to Arguments

Applicants' arguments in the Amendment A have been fully considered but are not persuasive.

Applicant argued the following:

Ferguson does not teach "a frame wherein multiple images representing life events are displayed and the appearance of one or more images changes based on adjustment of preferences".

The examiner does not agree for the following reason:

Ferguson clearly teaches a frame wherein multiple images representing life events are displayed (See figs. 6 and 14; each image comprises of a plan event icon with one or more additional "arms" (elements 120a, 126, and 124 as shown in fig. 6); the plan event is further demonstrated in col. 7, lines 62-67) and the appearance of one or more images changes based on adjustment of preferences (the appearance of one or more images changes as disclosed in col. 9, lines 45-56 when a user repositions the plan event icon as disclosed in col. 8, lines 65-67 and further in col. 9, lines 1-11).
